EMPLOYMENT HISTORY

Agu 2021 — Present

Front End Developer, Loop Corporation
Cochabamba, Bolivia

Who gives a crap [USA]

- Optimized the checkout page by automatically autofilling fields through API connections, reducing the dropout rate by 7%.
- Developed the client admin panel, migrating from a React SPA to a Next.js application, improving performance through server-side rendering.
- Created a new shopping cart, reducing cart abandonment by improving UX and implementing a pop-up system.

Tech Stack:

React, Liquid, Shopify, Typescript, Styled Components, Apollo graphql, Redux, Nextjs, Webpack

Acceso 360 [Spain]

- Developed an integrated system for management, collection, and automated content delivery and news by creating a SPA with React using Domain Driven Design, used by over 300 marketing agencies, news agencies, content agencies, and governments.
- Optimized the creation of advanced search for news collection, improving quality and match of collected news by implementing Lucene syntax validation.
- Developed the design system using React, Tailwind, StoryBook, and Vitest, increasing development team productivity through reusable components.
- Implemented unit tests using Vitest, doubling the number of unit tests in the application, reducing bugs and improving code quality.

Tech Stack:

React, Tailwind, Zustand, Tankstackquery, Typescript, Docker, API Rest, Vitest ,DDD

Aug 2023 — Feb 2024

Front end Developer, Alhasoft (Freelancer)
La Paz, Bolivia

- Developed a real estate investment platform with Next.js, leveraging its server-side rendering capabilities for SEO optimization, successfully raising over $10,000 on the first day of launch.
- Integrated a payment gateway, allowing users to utilize more than 5 payment methods by connecting to the "PagosNet" API.
- Implemented user validation and restriction through an authentication system, account validation, and password recovery.
- Utilized Web3 to interact with the blockchain and generate smart contracts.

Tech Stack:

React, NextJs, Tailwind, Redux, Typescript, API Rest
